PROFESSIONAL SUMMARY

Passionate Full Stack Developer (B.Sc. IT, 2026) who loves building websites and apps and taking them from the first line of code to a live deployment. Develops end-to-end web applications with Python, Django and Flask, with hands-on experience in REST APIs, WebSockets and databases. Delivered 2 client projects for real users, including a pharmacy management system, along with 5+ live-deployed applications such as a real-time chat app and an AI chatbot using the Claude API. Also builds Android apps with Kotlin and IoT projects on Raspberry Pi. Seeking an entry-level Full Stack Developer role in Mumbai / Navi Mumbai to keep growing and build products people actually use.

INTERNSHIP EXPERIENCE

IT Support Intern | Jetking Dadar Learning Centre | Aug – Sep 2025
- Set up systems, installed software and configured hardware across training lab computers.

CLIENT PROJECTS

Kavita Chemist Web App | Python, Django, SQLite | Apr 2026
- Developed a full-stack pharmacy management system with product catalog, stock tracking and a secure admin panel.
- Designed database models and CRUD workflows for managing medicines and inventory.
- Deployed to production on Render and handed over to the client.

Glory Primary School Web App | Python, Flask | Apr 2026
- Built a custom Flask web application for the school under the SIWS Community Engagement Service Program.
- Delivered to the school's requirements and handed over to the school.

OTHER PROJECTS

NexusChat | Django, WebSockets
- Built a real-time chat application where users can sign up, log in and message each other with instant delivery, no page refresh needed.
- Used WebSockets for two-way live communication and Django's authentication system to keep conversations secure and tied to registered users.

Claude AI Chatbot | Python, Claude API
- Built a conversational chatbot powered by the Claude API, using prompt engineering to shape the quality and tone of responses.
- Parsed structured JSON responses from the API to handle replies reliably and display them cleanly to the user.

Student Attendance System | Flask, Python
- Created a CRUD application for tracking student attendance, allowing records to be added, viewed, updated and deleted.
- Deployed the application live on Render, making it accessible online from any device.

More Projects | Kotlin, Streamlit, Raspberry Pi
- Built an Android app (Kotlin), Streamlit apps and a Raspberry Pi IoT project, showing range across mobile, data apps and hardware.
- All 29 repositories are on GitHub (github.com/Khushishivkar) and featured on my portfolio (khushishivkar.github.io).

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, Responsive Design
Backend: Python, Django, Flask, REST APIs, JSON, WebSockets, Authentication, CRUD
Database: SQLite, SQL fundamentals
Tools & Deployment: Git, GitHub, Render, Linux, Claude API, Prompt Engineering
Also Familiar With: Kotlin, Android SDK

CERTIFICATIONS

- Data Analytics Job Simulation, Quantium (via Forage), 2025
- Data Science & Analytics, HP LIFE, 2026

EDUCATION

B.Sc. Information Technology | SIWS College, Wadala, Mumbai | 2023 – 2026
HSC (Science) | RD National College, Bandra, Mumbai | 2021 – 2023
